HAIG TIENTCHEU

SOC Analyst | Threat Hunter | Vulnerability Management | Incident Response | Cloud Security

Riverdale, GA · +1 404-985-1493 · tchative@gmail.com · linkedin.com/in/haig-tientcheu · haig-tientcheu.vercel.app

Active clearance eligible · Willing to relocate

Summary

Cybersecurity professional with experience implementing, managing and monitoring security controls across Microsoft 365, Azure and hybrid environments. Hands-on expertise with Microsoft Defender XDR, Entra ID, Intune, Palo Alto Panorama and Purview, with a track record of hardening endpoints and tuning security alerts. Azure-certified with practical experience in cloud administration, architecture, identity, networking and security. Experienced in supporting NIST CSF, CIS Benchmarks, SOC 2 and GRC compliance across multi-tenant managed services environments. Currently pursuing the CCSP certification.

Experience

Security Operations Analyst & Threat Hunter Mar 2025 – Present

Computer Aid Inc (CAI) La Verne, CA

- Monitored and triaged security alerts from SIEMs across critical infrastructure environments, escalating confirmed incidents and coordinating containment with internal teams and MDR partners.
- Provided Tier 2 escalation support for security incidents, coordinating investigation, eradication and post-incident reviews to implement corrective actions and prevent recurrence.
- Built and maintained security automation using Logic Apps and SOAR workflows, and developed runbooks for common alert triage and incident response scenarios.
- Investigated security events using Palo Alto Panorama (log analysis, threat validation, escalation) and optimized firewall rules and security profiles to reduce operational noise.
- Executed threat hunts based on adversary TTPs and indicators of attack, using KQL with open- and closed-source CTI feeds to detect and isolate persistent threats.
- Compiled multi-format intelligence reports and communicated technical risks and mitigation strategies to executive management and cross-functional teams.

Vulnerability Management Analyst (On-Call) Jun 2023 – Mar 2025

Ozzy's Cyber Consultancy Services Atlanta, GA (Remote)

- Executed end-to-end vulnerability assessments with Tenable Nessus and Qualys; managed agent deployment, scan configuration and health monitoring across multi-tenant environments.
- Prioritized CVEs by CVSS severity, exploitability and business impact, cutting remediation SLA by 30% while maintaining CIS Benchmark alignment.
- Implemented and validated technical controls mapped to NIST CSF and SOC 2, supporting GRC teams with evidence collection and assessment documentation.
- Delivered vulnerability reports and remediation guidance to IT leadership and C-level stakeholders; supported incident response with root-cause analysis.

System Admin | Help Desk Analyst II May 2021 – Feb 2025

Computer Aid Inc (CAI) Allentown, PA (Remote)

- Deployed and maintained Microsoft Defender for Endpoint and Intune compliance policies with hardening baselines across Windows and Linux.
- Managed Entra ID (Conditional Access, PIM, RBAC, app registrations), Intune MDM and Exchange for 500+ end users across multiple tenants.
- Configured Azure security controls (NSGs, Key Vault, Azure Policy) and enforced MFA and privileged access through Conditional Access.
- Configured Microsoft Purview DLP, sensitivity labels and retention; automated onboarding and offboarding with PowerShell for zero-day privilege termination.

Azure Cloud Engineer (Intern & Lab Projects) Lab & projects

Hands-on Azure lab Remote

- Designed and deployed Azure landing zones with Azure Policy, RBAC, networking and storage controls.

- Automated VM provisioning and patching with Azure PowerShell and ARM/Bicep; validated backup, disaster recovery and monitoring scenarios.

Projects (Web Development & Vibe Coding)

- StokNextra (stoknextra.com), Oct 2026 – present: multi-tenant till, stock and accounting SaaS (Next.js, NestJS, PostgreSQL, Docker) built with Claude Code; tenant isolation, RBAC, Argon2 hashing.
- SongFromWithin (songfromwithin.com), Sep 2026 – present: e-commerce audio platform (Next.js, Supabase, Stripe, Claude API) built with Claude Code; card data handled by Stripe only.
- Personal portfolio and digital business card, Nov 2026: Next.js 16 with a strict nonce-based Content Security Policy, built with Claude Code.

Education

- **M.S. Cybersecurity & Information Assurance**, Western Governors University (WGU)
- **B.S. Cybersecurity & Information Assurance**, Western Governors University (WGU)
- **A.S. Cybersecurity**, Atlanta Technical College

Certifications

- Microsoft Certified: Azure Solutions Architect Expert
- Microsoft Certified: Azure Administrator Associate
- CompTIA SecurityX (CASP+)
- CompTIA PenTest+ ce
- CompTIA CySA+ ce
- CompTIA Security+ ce
- CompTIA Network+ ce
- CompTIA Project+ ce
- Systems Security Certified Practitioner (SSCP)

Technical Skills

SIEM & XDR: Microsoft Sentinel, MS Defender XDR, CrowdStrike, Elastic SIEM, LMNTRIX XDR, Defender for Identity, Defender for IoT

Vulnerability Management: Tenable Nessus, Qualys, Tanium

Network & Zero Trust: Palo Alto Panorama, Zscaler

Identity, Endpoint & Data: Entra ID, Intune (MDM), SCCM, Microsoft Purview

Automation, IaC & Query: KQL, PowerShell, Python, SQL, Terraform, Bicep, ARM, SOAR playbooks, Logic Apps

Frameworks: MITRE ATT&CK, Cyber Kill Chain, NIST CSF, CIS Benchmarks, SOC 2, OSINT

ITSM & Awareness: ServiceNow, KnowBe4

Leadership & Community

- Founder & President, The Way of Hope (international NGO, Cameroon), 2017 – present
- Volunteer, Shield of Faith Charities International (support for needy children worldwide)
